### DETAILED ACTION

1. Claims 1-34 were previously examined.
2. Claims 35 and 36 were added.
3. Claims 1-36 were examined.

#### ***Section I: 4<sup>th</sup> Non-Final Rejection (4<sup>th</sup> Office Action)***

##### ***Claim Rejections - 35 USC § 101***

4. Claims 1-36 are rejected under 35 U.S.C. 101 because the limitations reflect non-statutory subject matter involving signal theory with no specific application. For example, the specification on page 7, lines 6-21, claim no specific application to which the signal block identities and applications are unknown. If a claimed process manipulates only numbers, abstract concepts or ideas, or signals representing any of the foregoing, the claim is not being applied to appropriate subject matter. Schrader, 22 F.3d at 294-95, 30 USPQ2d at 1458-59. The Federal Circuit also recognizes that the fact that a nonstatutory method is carried out on a programmed computer does not make the process claim statutory. Grams, 888 F.2d at 841, 12 USPQ2d at 1829 (claim 16 ruled nonstatutory even though it was a computer- implemented process).

A product is a tangible physical article or object, some form of matter, which a signal is not. That the other two product classes, machine and composition of matter, require physical matter is evidence that a manufacture was also intended to require physical matter. A signal, a form of energy, does not fall within either of the two

Art Unit: 2123

*definitions of manufacture. Thus, a signal does not fall within one of the four statutory classes of § 101.*

On the other hand, from a technological standpoint, a signal encoded with functional descriptive material is similar to a computer-readable memory encoded with functional descriptive material, in that they both create a functional interrelationship with a computer. In other words, a computer is able to execute the encoded functions, regardless of whether the format is a disk or a signal.

These interim guidelines propose that such signal claims are ineligible for patent protection because they do not fall within any of the four statutory classes of § 101. Public comment is sought for further evaluation of this question.

***Section II: Response to Applicants' Argument (3<sup>rd</sup> Office Action)***

**Drawings**

5. Applicants are thanked for responding to this issue. Objection is withdrawn.

***102(b)/103(a)***

6. Applicants are thanked for responding to this issue. Applicant's arguments, see pages 3-14, filed 10/19/05, with respect to the rejections of claims 1-16, 28-36; 27 under 35 U.S.C. 102(b) and 103(a), respectively, have been fully considered and are persuasive. Therefore, the rejection has been withdrawn. However, upon further consideration, a new ground(s) of rejection is made in view of 35 U.S.C. 101.
